

## Specialty Products **FAQ**

Part number 84110

### Lexus IS Rear Camber Kit

**Q1: The 2012 catalog shows P/N 84110 Cam Bolts for rear camber. When will this kit be available?**

**A1:** Specialty Products will not be releasing this kit. The 84110 concept proved more difficult to use than we anticipated, so it is being replaced by a new part, #67520, which will be an EZArm™ for camber adjustment (replaces the upper lateral link) and a cam bolt to adjust any setback change. The 67520 will provide up to  $\pm 1.5^\circ$  of camber. It is expected to be on shelf late Q3.
