## Specialty Products Company

MSS	2.016	<b>Chassis Grease Specifications</b>	
Revision:	<b>B</b>	Added content clarifying amount of grease to be applied.	
Date:	<b>29 Apr 21</b>	Approved by:	<b>Andrew Kropp</b>

### Scope:

This specification summarizes the standard for “chassis grease” to be used in the assembly of flexible chassis joints produced by or for Specialty Products.

- Grease shall meet the specifications of NLGi #2, Grade LB per ASTM D 4950, *Standard Classification and Specification for Automotive Service Grease*.
- Grease shall contain 3% - 5% Molybdenum Disulfide.
- Unless otherwise specified on the SPC drawing document, the volume of grease to be applied is considered a minimum (MIN) amount.
