

## Specialty Products **FAQ**

Part number 67640

### Rear Arm for Subaru Impreza, WRX & STi

**Q1:** The 67640 is listed for the 1993-2007 Subaru Impreza and WRX, excluding STI. Is there something I can do to make the 67640 work on my STI?

**A1:** The STI uses a different sway bar link connection than the other vehicles in this group. The original 67640 was intended to be used with a full nut and bolt to go through the sway bar link connection. The STI sway bar link uses a stud on the end of the sway bar link. This stud can be installed through  $\frac{1}{2}$  of the SPC sway bar link (alum block) and retained with a nut. All other procedures for installing the 67640 will apply to the STI model.
